

How to... Set up multi-payments.

SBS Internet banking guides.

Step 1. ► Setting up multi-payments.

A multi-payment is a batch payment or a group of payments, here you can:

- Pay more than one payee at a time.
- Create a one-off multi-payment or create and save a template for future payments.
- Import a template from your accounting software, (the file must be in CSV format).

Only payees can be used for multi-payments, registered approved payees cannot be added.

Every new multi-payment will require an sms authentication code.
